NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2014-0083]

Agency Information Collection Activities: Submission for the Office of Management and Budget Review; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to a collection of information, unless it displays a currently valid OMB control number. The NRC published a *Federal Register* notice with a 60-day comment period on this information collection on April 14, 2014.

1. *Type of submission, new, revision, or extension:* Extension.
2. *The title of the information collection:* Notice of Enforcement Discretion (NOED) for Operating Power Reactors and Gaseous Diffusion Plants (NRC Enforcement Policy).
3. *Current OMB approval number:* 3150-0136.

4. *The form number if applicable:* N/A.
5. *How often the collection is required:* On occasion.
6. *Who will be required or asked to report:* Those licensees that voluntarily request enforcement discretion through the NOED process, and are granted enforcement discretion.
7. *An estimate of the number of annual responses:* 20.
8. *The estimated number of annual respondents:* 12.
9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 1492.
10. *Abstract:* The NRC's Enforcement Policy includes the circumstances in which the NRC may grant a NOED. On occasion, circumstances arise when a power plant licensee's compliance with a Technical Specification (TS) Limiting Condition for Operation or any other license condition would involve an unnecessary plant shutdown. Similarly, for a gaseous diffusion plant, circumstances may arise where compliance with a Technical Safety Requirement (TSR) or other condition would unnecessarily call for a total plant shutdown, or, compliance would unnecessarily place the plant in a condition where safety, safeguards, or security features were degraded or inoperable.

In these circumstances, a licensee or certificate holder may request that the NRC exercise enforcement discretion, and the NRC staff may choose to not enforce the applicable TS, TSR, or other license or certificate condition. This enforcement discretion is designated as a NOED.

A licensee or certificate holder seeking the issuance of a NOED must document the safety basis for the request, including an evaluation of

the safety significance and potential consequences of the proposed request, a description of proposed compensatory measures, a justification for the duration of the request, the basis for the licensee's or certificate holder's conclusion that the request does not have a potential adverse impact on the public health and safety, and does not involve adverse consequences to the environment, and any other information the NRC staff deems necessary before making a decision to exercise discretion.

In addition, the NRC's Enforcement Policy includes a provision allowing licensees to voluntarily adopt fire protection requirements contained in the National Fire Protection Association (NFPA) Standard 805, "Performance Based Standard for Fire Protection for Light-Water Reactor Electric Generating Plants, 2001 Edition" (NFPA 805). Licensees who wish to implement the risk-informed process in NFPA 805 must submit a letter of intent to the NRC. Licensees who wish to withdraw from the NFPA 805 risk informed process must submit a letter of retraction.
